

Founder | Lead Instructor

Christopher Garzon

Introduction

Chris has worked as a Data Engineer at Amazon, Lyft, and multiple startups. After starting his career as a data analyst at Amazon, he transitioned to DE with the help of great mentors — a journey that inspired him to start DEA. He's since helped over 1,000 students break into data engineering by demystifying career paths and focusing on real-world skills.

CTO - AWS Certified | Snowflake Certified | DBT Certified

Ninad Magdum

Introduction

Ninad brings over 8 years of experience in data engineering, data warehousing, devops, machine learning, mlops, genai and genai-ops. He's led 50+ end-to-end projects for top organizations including Walt Disney, CVS, Fastenal, Capgemini, etc. His expertise spans AWS, Azure, Snowflake, Databricks, GenAI(AWS), Time Series (ML), MLOps, DBT, Streamlit, Tableau, and more, with a strong focus on both cloud and on-premise architecture.

Linkedin: [Ninad Magdum](#)

Solution Architect – AWS Certified | Snowflake Certified | DBT Certified

Azmatul Azam

Introduction

With over 12+ years in data engineering and analytics, Azmat has led complex implementations for companies like Dell, Deloitte, and Walt Disney. His specialization includes AWS, DBT, Snowflake, Data warehousing, Kafka, etc where he brings strong architecture and design expertise to production-grade data systems.

Linkedin: [Azmatul Azam](#)

Python and Gen AI Coach

Tyler Vu

Introduction

With a PhD in Biostatistics from UC San Diego, Tyler has worked across healthcare and tech industries as a data scientist. At DEA, he handles onboarding and personalized learning plans while coaching students in Python fundamentals and real-world scripting.

Data Engineer SME

Aniket Kar

Introduction

Lead Data Engineer at Amazon with over 10 years of expertise in building reliable data pipelines and scalable cloud solutions. Aniket has experience in developing end-to-end ETL workflows using AWS services for building batch and real-time processing pipelines. Aniket has a strong understanding of both RDBMS and NoSQL systems and he enjoys solving complex problems and enabling data-driven decisions through efficient and well-architected solutions.

Linkedin: [Aniket Kar](#)

Sr. Data Engineer

Sakthivel Somasundaram

Introduction

Senior Data Engineer with 8+ years of expertise in designing, building, and optimizing scalable data pipelines and cloud-based solutions, with specific experience in Azure & AWS services (EC2, EMR, GLUE, Lambda, ADF, Databricks, ADLS) and leveraging GenAI solutions. Passionate about architecting high-performance data platforms using Python, PySpark, SQL, Spark, Databricks, and relational databases. Adept at Data Modeling, Data Warehousing, Data Governance, Performance Optimization and real-time data processing.

Linkedin: [Sakthivel Somasundaram](#)

Cloud/DevOps/Big Data Architect and Full-Stack CloudOps Engineer

Shartul Kumar

Introduction

Experienced Cloud/DevOps/Big Data Architect and Full-Stack CloudOps Engineer with 15 years of industry experience. Specializing in architecting robust cloud solutions, implementing comprehensive DevOps strategies, and enhancing resiliency, efficiency, and performance as a Site Reliability Engineer. Possesses deep expertise in AWS, Microsoft Azure, GCP, PCF, OpenStack, OpenShift, and IBM Cloud, covering a wide array of services. Highly proficient in Kubernetes (Certified Kubernetes Administrator) including GKE, AKS, EKS, and OpenShift, with hands-on experience in Multi-Cluster Istio service mesh, OpenTelemetry, and Traffic Management & Security. Adept at Infrastructure as Code (Terraform, CloudFormation, ARM, Pulumi), SCM (Puppet, Ansible), HA/DR design, and DC Migration. Skilled in defining and improving Site Reliability Metrics (SLO/SLI), implementing Observability (Monitoring, Logging, Tracing), and streamlining release management with a focus on GitOps maturity. Strong background in Cloud Security, IAM, RBAC, and compliance policies (GDPR/PCI DSS/HIPPA).

Linkedin: [Shartul Kumar](#)

Senior Data Scientist

Vivek Mohan Srivastava

Introduction

Senior Data Scientist with 5+ years of experience enabling data-driven decision-making through advanced analytics, machine learning, and scalable data science solutions. Skilled in designing and deploying end-to-end AI/ML models across cloud platforms including Azure and AWS, with hands-on expertise in Lambda, Azure Data Factory (ADF), Databricks, and Azure Data Lake Storage (ADLS). Proficient in Python, Machine Learning, Deep Learning, and Natural Language Processing (NLP) for building robust and production-ready models.

Possesses specialized expertise in Generative AI, including Retrieval-Augmented Generation (RAG), Prompt Engineering, Agentic AI systems, and fine-tuning foundation models. Passionate about solving real-world business problems by architecting intelligent and scalable AI solutions.

Senior Data Engineer | Big Data & Cloud Solutions Expert

Neeraj Sen

Introduction

Results-driven Data Engineer with 10+ years of experience in designing, building, and optimizing scalable data platforms. Expertise in Hadoop, Spark, AWS, GCP, and Azure ecosystems, with a strong focus on ETL/ELT pipelines, data lakes, and cloud-based data warehousing (Snowflake, Redshift, BigQuery). Proven ability to lead cross-functional teams, implement data governance (Collibra), and drive end-to-end data solutions from concept to production.

Specializes in real-time & batch processing, data migration, and performance optimization using PySpark, Kafka, and serverless architectures (Lambda, Glue, Databricks). Adept at Agile methodologies, translating business needs into technical roadmaps, and collaborating with stakeholders to deliver high-impact data products.

Key Strengths:

- Big Data Technologies: Hadoop, Spark, Kafka, Hive, Snowflake
- Cloud Platforms: AWS (EMR, S3, Glue), GCP (Dataflow, BigQuery), Azure (ADF, Databricks)
- Leadership: Managed teams of 8+, mentored junior engineers, and led DevOps/Scrum initiatives
- Data Governance: Metadata management, lineage, quality checks (Great Expectations)
- Passionate about building scalable, automated data infrastructures that empower AI/ML and analytics.

Linkedin: [Neeraj Sen](#)

Lead Data Engineer

Priyanshu Gandhi

Introduction

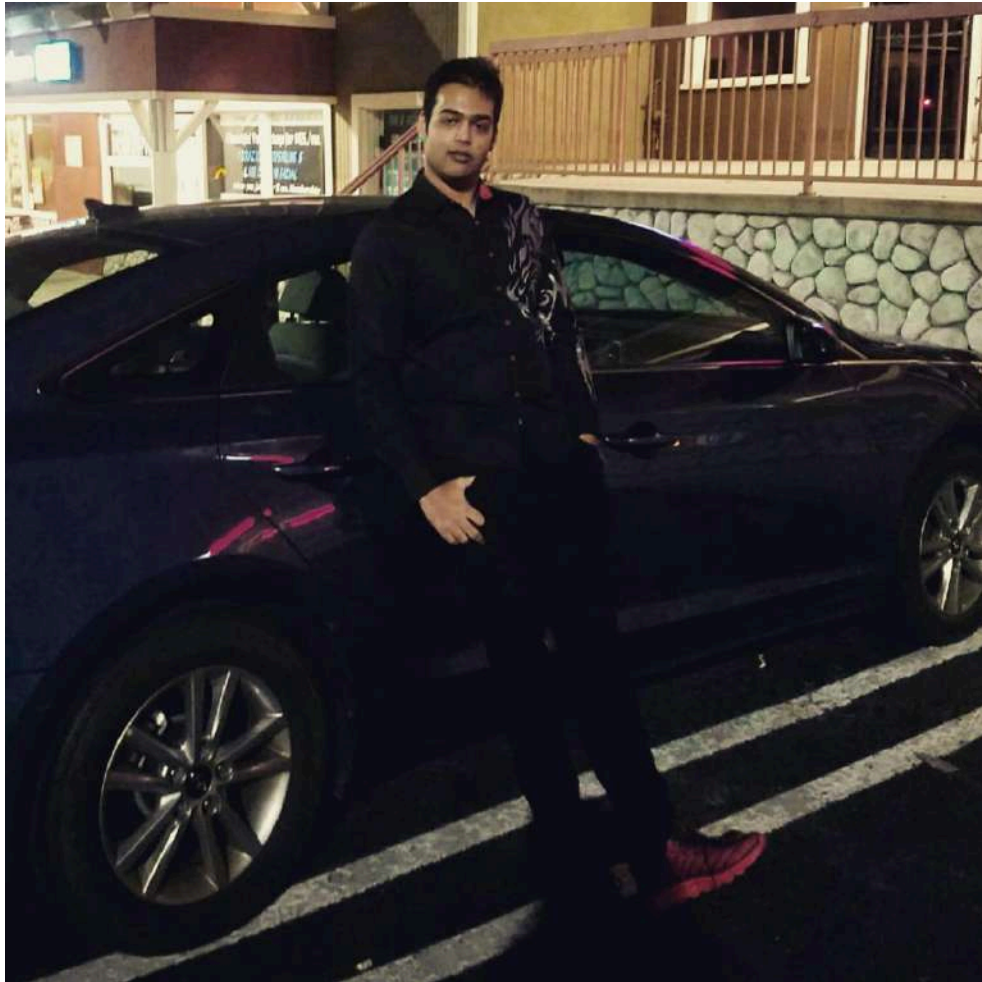

Priyanshu brings over 7 years of experience in data engineering, cloud analytics, large-scale ETL/ELT pipelines, and AI-driven data platforms. He has led end-to-end data modernization and migration initiatives for top organizations including Tripadvisor, Groupon, NatWest, and LTIMindtree. His expertise spans automation with Python & SQL, data warehousing on Snowflake and BigQuery, and data transformation with Apache Spark on AWS and GCP cloud infrastructures.

With 1,000+ hours of mentorship experience, Priyanshu is passionate about guiding engineers in building successful careers in data engineering.

LinkedIn: [Priyanshu Gandhi](#)

AI and Data Science Mentor

Rishov Chatterjee

Introduction

Rishov is Director of AI at IntegraConnect, with 7+ years of experience across Siemens, City of Hope, and Pathrise. He's placed over 150 students in data roles and specializes in LLMs, data science, and career mentoring. At DEA, he helps students break into top AI and DE positions with precision.

Coach for Project Managers

Chandan Somayya

Introduction

I bring 17+ years of corporate experience working as a Project and Program Manager with global organizations in Banking, Insurance, and IT domains. Over the years, I've successfully managed multi-million-dollar programs (\$5M–\$10M), led cross-functional teams of up to 80 members, and delivered complex projects across geographies. My expertise spans Agile, Waterfall, and Hybrid methodologies, with strong hands-on experience in stakeholder management, delivery governance, and enterprise transformation initiatives.

As a coach for Project Managers, I combine my real-world delivery experience with practical coaching tools, so you not only learn the frameworks—like scope, budgeting, scheduling, risk, and communication — but also master the people side of project management such as handling office politics, motivating teams, and influencing leadership.

I have managed end-to-end projects in Data Engineering, Full-Stack Development, .NET, DevOps/DevSecOps, and Product Implementations, including large-scale client onboarding and enterprise transformation initiatives. My role has consistently involved driving delivery excellence, aligning cross-functional teams, and ensuring successful business outcomes across banking, insurance, Retail, Asset Management and wealth management domains.

Coach for Project Managers and and Technical Delivery Specialist

Pushkar Mahajan

Introduction

Experienced Project Management and Technical Delivery Specialist with a strong foundation in software engineering and IT transformation. Brings over 6 years of cross-functional experience in managing digital initiatives, coordinating enterprise-scale projects, and driving innovation across sectors including finance, healthcare, and public services.

Expert in Agile, Hybrid, and ITIL-based methodologies, with a proven track record in leading ServiceNow CMDB implementations, Azure monitoring setups, GitLab DevOps migrations, and external digital experience transformations. Skilled in stakeholder engagement, risk management, and change enablement, ensuring alignment between business goals and technical execution. Holds a Master's in Engineering Project Management with distinction, with academic research focused on hybrid project management frameworks for IT organizations.

Technical capabilities span CI/CD pipelines, infrastructure monitoring, and automation using tools such as Jenkins, Git, JFrog, and Azure Monitor. Certified in ITIL and Tech Risk & Compliance (OneTrust), with a strong focus on governance, observability, and continuous improvement.

LinkedIn: [Pushkar Mahajan](#)

Big Data & Cloud Data Engineer

Chandan Kumar

Introduction

Experienced Big Data & Cloud Data Engineer with 8+ years of expertise in architecting and building scalable data platforms on cloud environments. Specializes in designing and implementing robust data pipelines, optimizing ETL/ELT workflows, and delivering high-performance analytics solutions. Proficient in AWS (EMR, S3, Glue, Lambda, Step Functions, Athena), Databricks, and Hadoop ecosystem, with deep hands-on experience in Apache Spark (PySpark, Scala) and Delta Lake for batch data processing. Skilled in integrating and processing data using Kafka, with strong expertise in data modeling, partitioning, and performance tuning for petabyte-scale datasets. Adept at implementing DataOps practices, CI/CD for data pipelines, and modularized PySpark jobs with JSON-driven configurations for reusability and flexibility. Experienced in Infrastructure as Code (Terraform) for provisioning and managing scalable, secure, and cost-optimized cloud environments. Strong background in SQL (Hive) and data warehousing concepts with experience in migration and modernization to cloud-native architectures. Skilled in handling data security, encryption, IAM policies, cross-account access, and compliance-driven pipelines. Proven ability to integrate observability (monitoring, logging, alerting) and optimize cost, scalability, and reliability in production-grade big data environments.

LinkedIn: [Chandan Kumar](#)

Lead Data Engineer

Avirup Ghosh

Introduction

Avirup brings 6+ years of data engineering experience across companies like Disney, Bank of America, and Capgemini. He specializes in automations using Python, SQL, Snowflake, and Streamlit, helping students understand how modern pipelines are designed, built, and scaled in production.

Sr Data Engineer | AWS SME | Snowflake

PVH Kareem

Introduction

With 4+ years of experience in data engineering and cloud-based data solutions, Kareem has contributed to impactful projects involving AWS Glue, PySpark, and big data pipelines. My expertise spans across building scalable ETL workflows, automating data processing, and deploying production-ready data systems on AWS. I am passionate about translating complex data challenges into elegant, high-performance solutions.

Linkedin: [PVH Kareem](#)

AI/ML Computational Science Analyst

Meenakshi Kharwade

Introduction

Meenakshi builds conversational AI and enterprise AI tools at Accenture and NPCI. She specializes in LLMs, RAG frameworks, document parsing, and secure AI systems. With a background in engineering and advanced AI certifications, she helps DEA students bridge AI theory and practice.

Linkedin: [Meenakshi Kharwade](#)

Senior Data Engineer | Coach

Nehal Singh

Introduction

Nehal brings in around 7 years of experience in the field of Data Engineer and specializes in a range of data engineering tools and platforms, including but not limited to Azure, SQL, Python, Pyspark, Databricks, Power BI, SSRS, and various ETL/ ELT tools. His expertise lies in building and managing robust scalable data pipelines and analytics solutions with a strong focus on Cloud Modernization and Migration initiatives. He helps DEA students in grasping technical concepts through practical, and industry level examples.

SQL and Data Modeling Coach

Nikola Vukovic

Introduction

Nikola specializes in foundational data engineering skills — especially SQL and relational data modeling. With a background in software engineering, he coaches students through tough SQL interviews and builds their confidence with hands-on problem-solving for real-world scenarios.

Manager of Customer Success

Milada Ivanovic

Introduction

Milada combines a background in software engineering with 5+ years in customer success leadership. She supports students with SQL, data modeling, behavioral interviews, and resume crafting. Holding degrees in IT and Psychology, Milada is passionate about motivating students and helping them realize their full potential.

Operations Lead & Job Apply Process Lead

Pooja Dodamani

Introduction

Pooja oversees the entire job application system at DEA, leading the job apply team and managing operations across SOPs, referral systems, and employer partnerships. With 5+ years of hiring experience and a background in CS and Operations, she's instrumental in driving job outcomes for students.

Student Success Manager (Retention)

Stefan Lojanicic

Introduction

Stefan ensures students are consistently supported, retained, and progressing through their goals. His focus is on creating seamless, guided experiences for learners from start to finish within the DEA ecosystem.

Student Success Manager (Retention)

Mary Latoza

Introduction

Mary brings cross-industry experience from tech, education, and business ops. At DEA, she supports students with interview prep, resume improvements, and career clarity — helping them confidently land roles that match their strengths and aspirations.

Customer Success Manager

Payal Dedhia

Introduction

With 20+ years in media and 8 years in edtech, Payal leads with deep operational and coaching experience. She's coached 13,000+ students, led ad campaigns for Uber and Airbnb, and built AI-powered platforms. At DEA, she helps students optimize resumes, LinkedIn, and overall job readiness.

Customer Success Manager

Yash Kantharia

Introduction

A CS graduate from Pace University, Yash blends strong technical acumen with people-focused coaching. With hands-on experience in LLMs, cloud infrastructure, data pipelines, and NLP systems, he helps students navigate both foundational and emerging technologies with confidence.

Customer Success Manager

Afnan Saeed

Introduction

With a Master's in Business Analytics and a CS background, Afnan brings both technical depth and business strategy to DEA students. He supports learners with SQL, modeling, resume help, and AI interview prep, drawing on his work with Power BI, Python, and AWS to drive real results.

Customer Success Manager

Om Gaikhe

Introduction

Om holds an MS in Data Science and brings strong academic and industry experience. He's published award-winning research at AAAI, teaches AI and ethics at Pace University, and helps DEA students master technical topics with clarity and real-world application.

Customer Success Manager

Osaki Pokima

Introduction

With a background in Cybersecurity and Computer Science, Osaki brings problem-solving and onboarding excellence to DEA. He transitioned into a sales-focused role by choice, blending his IT background with a passion for supporting learners in tech career transitions.

Customer Success Manager

Cristian Mamota

Introduction

With a versatile experience ranging from tech and sales to customer success, Cristian ensures that students are getting the most out of the program, have a high success rate, and makes them aware that they're in the right place to achieve their goals.
